INTERNSHIP PROGRAM FOR POST GRADUATES IN CLINICAL PSYCHOLOGY FOR 6 MONTHS Vacancy - 01

Applications are invited from Post Graduates in Clinical Psychology for internship program in Child Development Centre for 6 months. The intern will get exposure to various clinical and community research programs related to childhood disability assessment and intervention. They will be included in the various training programs organized by CDC during their internship period. No internship fee will be charged for this program and the interns will not get any stipend during the internship period. The interns will get an experience certificate including their participation in various activities in CDC. Though the internship shall be for a period of 6 months, if the performance is not satisfactory he/she shall be relieved after a period of one month. It may be noted that, if the intern decides to leave the program before the proposed period of six months, he/she shall pay a penalty for the period attended as per CDC internship rates with respect to CDC proceedings No 282/S5/CDC/2017.
