

FACTSHEET JUNE 2025

PARENT TRAINING PROGRAMS

On 21.06.2025, two parent training sessions related to Autism Spectrum Disorder (ASD) and social communication difficulties were conducted at the MKC Nair Auditorium, CDC, with around 50 participants attending each session. The ASD Parents Training Session led by Ms. Prasanna GL focused on enhancing parents' understanding of ASD and strategies to support their children's developmental needs. On the same day, another online session on behavioural management of children with social communication issues provided practical guidance to parents on managing challenging behaviours and improving communication skills at home. Both programmes served as interactive platforms to empower parents with knowledge, confidence, and effective caregiving strategies.

CHILD DEVELOPMENT CENTRE CLINIC-WISE PATIENT ATTENDANCE

Compassionate care. Holistic development. Brighter tomorrow.
