Training Programme for Anganwadi Workers on Early Detection of Developmental Delay

A Training Programme for Anganwadi Workers on Early Detection of Developmental Delay among 3–6 year old children was conducted in the Trivandrum Corporation area from 16th to 25th February 2026. A total of 9 training programmes were organized during this period. The programme aimed to enhance the knowledge and skills of Anganwadi workers in identifying early signs of developmental delay in preschool children, enabling timely referral and intervention. Topics covered included developmental milestones, warning signs of delay, screening methods, and the importance of early intervention services.

A total of 610 Anganwadi workers participated in the training sessions. The programme provided an interactive platform for participants to clarify doubts and strengthen their role in community-based early childhood development monitoring.
